COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Single Parallel Bar is a great addition to commercial playground areas. This playground climber is best for children aged five to twelve, and is built to handle heavy traffic; the sturdy frame can handle the weight of up to four children at one time. Children reach the parallel bar from either side ladder or make their way across the parallel bar hand over hand. Fun and challenging, this climber allows children to be entertained while testing their strength and endurance skills. The Freestanding Single Parallel Bar is designed for strength, safety, and longevity, and uses quality materials while following all ASTM and CPSC playground safety guidelines for commercial playground equipment. The climber is 7 feet in height once assembled and installed, and it comes with all hardware necessary for installation.
