CPSC PUB #325

Children love when they get to choose what they get to play with and the Power Player Playground Structure has so many features that they are bound to find something they want to play with. This structure is constructed of 3.5-inch diameter posts, steel railings, and durable rotomolded plastics. Some of the features included in this structure include five different types of climbers, two chute slides, a triple rail slide, a talk tube, a chin bar, a double parallel bar and horizontal ladder, and multiple interactive activity panels. This structure does meet or exceed ASTM and CPSC safety guidelines and is customizable in a variety of different colors. The Power Player Playground System is made for commercial use and is appropriate for a variety of age groups.
