Use Zone: 40' 6" x 55' 11"

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Shining Mountain Playground Structure is an all-inclusive ADA structure that includes three landing platforms connected by gently inclining ADA ramps. The platforms provide those in a wheelchair or using a walker a level place to access the many interacting play components and the room for the wheelchair to make a complete turn. Of the many activity panels on the Shining Mountain Playground Structure, the gear and driving panel are among the favorites of most children. Kids can enter the Shining Mountain Playground Structure from the ADA ramps or one of the many climbers including a Clover Climber, Lily Pad Steps, and Bedrock Climber. A triple rail slide offers kids the classic sliding playground activity. All components of the Shining Mountain Playground Structure are built for public use in parks and schools. Heavy-duty 5-inch diameter steel posts support the steel decks and ramps, offered in a rainbow of colors.
