Age Group: 2 to 12 years

Use Zone: No use zone required.

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Hard to say but easy to play, the Glockenspiel is a percussion instrument with metal bars laid out in pitch order. While similar to its wooden xylophone cousin, it sports a set of metallic bars instead. Perfect for children of any age or size, this instrument teaches children through play about rhythm and music. This could be the start of a lifelong love for music setting them on a course towards a musically inspired occupation or even just a relaxing hobby. The Glockenspiel comes with a set of special mallets for capturing the next melody out of the air on the aluminum bars by creating clear, crisp tones. The Glockenspiel's iconic design will draw in those that are curious and make them into musicians in minutes.
