Use Zone: 1 Bay (32' x 33'); 2 Bays (32' x 44'); 3 Bays (32' x 55'); 4 Bays (32' x 66'); Measurement using Standard Belt Seats (changing seat type can change the required space)

The tri-pod swing frame is available in 8 and 10 foot heights for increased swinging potential. The tripod design is often favored over the bipod design for increased sturdiness, although with modern steel technology and proper installation both swings are equivalent to one another. The frames and top rail are available powder-coat painted pipe at an up-charge. Contact a sales associate for painted swing up-charges. Each bay includes two belt seats and all necessary chain and hardware for proper installation and use in a school or park. The swing specifications are as follows: 2-3/8" legs, 2-3/8" top rail, 8' installed height. The fittings (joint connectors) are painted at no additional cost.
