It always offers peace-of-mind when playground equipment can support the weight of an adult, yet it has been specifically made to be safe and fun for a child. This is just one of the reasons why this Dolphin Jump by Pierceton is such a popular pick on the playground or at daycare facilities. As the name implies, this piece of equipment is shaped like a dolphin and since it is crafted from a one-piece rubber mold, there is no chance for it falling apart, and there are no rough seams exposed to cause scratches. It is available in four fantastic colors, and this Dolphin Jump is safe, durable, and designed to accommodate the excitement and activity level of children of all ages.
