Children will delve deeper into their imaginations with the Double Fun Tube by Childforms. The unique oblong design gives children the extra space that traditional round tubes are missing. The 30-inch clearance ensures a fun playtime for even the tallest of children. The Double Fun Tube literally doubles the fun that was already had with the Single Direct Bury Fun Tube with the same great features of porthole windows, tall entrance heights, and in-ground mounting for extra strength. Each section of the tube is made from rotationally molded plastic which boasts both durability and has the heat resistance. Available in either Neutral or Primary color palettes, its sure to match your play-scape vision.

If you'd like a slightly different look to your Fun Tube, be sure to take a look at our Double Fun Tube With Blue Entrances.
