**Footprint:** 4' 2" x 8'

**Use Zone:** 20' x 16' 2"

### COMPLIES With:

ASTM F1487-17

CPSC PUB #325

The Freestanding Straight Swinging Ring Climber is a simple but effective overhead climber which features seven hanging ring grips that children can swing across to reach the other side. The rings hang freely, which enables them to oscillate in any direction with ease. This allows kids to effortlessly swing from them, using their momentum to help them reach the next ring. This added motion makes the Freestanding Straight Swinging Ring Climber potentially more exciting than an overhead climber with fixed rungs. The smaller size of the rings also adds a bit of a hand-eye coordination challenge, especially when the user is in motion. If a child tries to grab the next ring and misses, they can always try again on the next swing. Each ring has a galvanized metal finish and an ergonomic shape specially designed to minimize the discomfort on a child's hands. The powder coat paint on the support posts, ladders, and overhead beams comes in a variety of colors per your specifications.
