

6 Foot Landscape Timber with Spikes

MSRP ~~\$110.00~~

SALE \$94.00

Highlights:

- Timbers are made from recycled plastic
- Edges come together to form a solid barrier
- Essential component to most playgrounds
- Quick and easy to install

We know that playground mulch can be a costly and necessary investment for any park or recreation space. That's why our 6-Foot Landscape Timber makes the perfect addition to your outdoor playground. Your mulch will stay put for much longer, saving you time and money, while making your playground a safer place for kids, students, and patrons. Each timber features one foot of height and is constructed from recycled plastic, making it an eco-conscious choice for playgrounds concerned about lowering their carbon footprint. And every slab can be shipped together with a thirty-inch spike for easy and secure installation of your playground border. Your surface will stay contained better. It's a product that quickly pays for itself. Please note: we don't recommend the timbers for sand or pea gravel.
