### Poured-in-Place Rubber Surfacing

Poured-in-place rubber surfacing is one of the safest and most maintenance-free playground surfaces available. Each year, more than 200,000 children under age 14 are sent to the emergency room for injuries that occurred on the playground. Out of these injuries, 67% resulted from falls or equipment failures. One of the most effective ways to reduce the risk of serious injury on the playground is to use safe surfacing such as children's rubber flooring.

This seamless poured rubber playground surface is installed to withstand years of rugged use. The surfacing is applied to a 4-inch tamped aggregate stone base, which we can also supply. Children's rubber flooring is available in a variety of colors or color combinations, depths, and custom designs.

This product is certified by the International Play Equipment Manufacturers Association (IPEMA) and meets or exceeds requirements of ASTM, the Americans with Disabilities Act, and the Consumer Product Safety Commission. AAA State of Play sells only reliable products made from commercial-grade materials such as this poured rubber playground surface, which is warranted for a minimum of five years. (Warranty specifics will vary based on the type and amount of rubber used.)

If you would like a free quote, add poured-in-place surfacing to your cart or call one of our sales associates at 1-877-826-2776. [\[Read More\]](#)
