- Sturdy but easy to close with S Hook pliers
- Designed to support the weight of a child while playing

Age Group: Not Applicable

COMPLIES With:

ASTM F1487-17

CPSC PUB #325

Swing Hooks

Stabilize your swing with a large S-hook. These S-hooks are designed to fasten a chain to swing hangers and swing seats. Each S-hook is commercial-grade and made for a specific use. We recommend the 3/8-inch-by-3-inch hook for most applications. The 4-inch large S-hook is recommended for swing hangers, tire swivels, and washer swing seats.

Almost 80% of the playground injuries that occur each year are due to falls. Of these injuries, about 28% occur on swings or swing sets. Reliable swing set equipment like swing hooks from AAA State of Play can go a long way in preventing injury. While many injuries are the result of falls, a significant number occur because equipment breaks or malfunctions, but with proper installation of high-quality equipment from us, you won't need to worry about that.

AAA State of Play offers professional installation services so you can feel secure that your swings are secure. Our team offers expertise and high-quality workmanship. However, we also want to offer the knowledge that will allow you to safely install swings yourself if you choose. One of the reasons it may be difficult to install a large S-hook is a lack of proper tools. S-hooks must be closed properly to prevent them from becoming a pinching hazard for your playground. As you can see from our video on the subject, to properly install an S-hook, you'll need S-hook pliers. These pliers pinch the hook securely in place. [\[Read More\]](#)
