The Standard Complete Basketball Backstop is our most popular basketball hoop system. This backstop is perfect for commercial and backyard playgrounds alike, as all the necessary pieces are included to get your basketball hoop up and ready for play. This popular backstop features a one-piece 3-1/2 inch OD galvanized steel post with a 3 foot extension at its top. An extra foot extension is available and is factory produced longer, not an insert. An extension provides additional room between the court and post, thus increasing safety for players. This unit comes complete with post or aluminum backboard, single rim goal, and nylon net.
