

Standard Style Bike Rack

MSRP \$293.00

SALE \$250.00

Highlights:

- Offers a secure place to lock up to 2 bikes
- Must have for parks and schools
- Slim design allows for multiple racks to be put together
- Opt for a color that matches your area

The Standard Style Bike Rack from Webcoat gives a place for people to place their bikes or scooters as they take a break from riding. The shape and size of the tubed frame make it easy to lock their bikes against the rack. Up to two bikes can be linked to the rack. To make this rack even more useful, station multiple racks in a line to make a bike park. The slim design allows for several racks to be positioned together without taking up too much space. This makes it ideal for places that experience a lot of bicycle traffic such as parks, schools, or city sidewalks. The rack is made of galvanized tubing and then coated with a powder coat finish to prevent rust and scratches. Multiple color choices are available to harmonize the unit with your venue. Place it in the dirt with an in-ground mount or attach it to concrete with the surface mount. Talk to a sales representative for more details on other color options.
