- Available in ADA heights to bring variety to your park

Nothing beats a good picnic other than a group barbecue in late spring to early autumn. The 620 and 630 Rotating Pedestal Grill series from Ultra Site allows you to provide your patron's with that experience for years to come. The life of the grill is further lengthened by the black powder coating, which makes the metal more resistant to the elements. The 360° rotating pedestal allows the grill to be moved in any direction. However, this is not the only adjustable feature, the grate can be raised or lowered to the necessary height for whatever is being prepared. Choose between the Standard (280 square inches) or Large (300 square inches) box sizes.
