MSRP \$361.00

SALE \$307.00

Highlights:

- Fits 32-gallon receptacles
- Dome shape allows for more trash to fit
- Can be customized to fit your trash receptacle
- Cable attachment to keep secured is sold separately

This Steel Dome Top for Trash Receptacles by Webcoat is an essential accessory to your Webcoat trash can. This lid's dome shape is not only a classic and attractive style but the shape allows for more trash to easily fit, leading to less trash fall out around the trash can. Having a lid is highly suggested as it prevents messes that occur from trash falling out of the receptacle or people trying to throw away trash and missing the bin. The Steel Dome Tops are secured with a steel wire assembly mounted with one-way screws. Dome Tops have spring-loaded, self-closing doors. The lid comes coated in a textured polyethylene finish to make it durable. Choose from a wide variety of color finishes to match your receptacle or venue. It comes in sizes that will fit 32-gallon Webcoat trash cans. This dome is for Webcoat receptacles only.
