- Self closing door keeps out odors, rain, and pests

Webcoat's Plastic Dome Top for Trash Receptacles is incredibly helpful if you wish to further reduce the likelihood of litter buildup at your park, retail center, or schoolyard. This dome top is a great way to contain trash overflow on an existing 32-gallon Webcoat waste bin. The cap's self-closing door stops trash from blowing up and out of the liner, reduces the chance off-putting odors will exit into the area, and discourages animals from getting into the container. A trash receptacle that a raccoon or squirrel is able to root around in and toss litter out of isn't doing the best job it could. Additionally, this receptacle top completes the look of the bin that it will rest on and makes sure the surrounding area stays looking just as spiffy. The Plastic Dome Top for Trash Receptacles is available in the following colors: black, blue, green, brown, or green. Complete your trash receptacle purchase with a lid that fits and will create a better environment for your guests.
