

Taper Standard Style Trash Receptacle

MSRP \$519.00

SALE \$442.00

Highlights:

- Lid and liner sold separately
- Diamond shaped pattern
- Comes in any of Webcoat's bold colors
- Can be mounted with additional purchase

The Taper Standard Style Trash Receptacle by Webcoat is built with expanded metal that features a diamond-shaped pattern. It offers a gradually narrowing design for a slim appearance. This trash bin is covered in a thick, textured polyethylene coat that comes in a variety of colors that you can choose from to match your area. The coating is also UV resistant and ensures protection of the trash receptacle against weather and time. This makes the bin a great addition to any outdoor environment such as a park, sidewalk, or business due to its strength, durability, and attractive look. It will also work great indoors in an office. Be sure to add a lid and liner to this receptacle. Ash urn attachments are not available for this unit. This bin can be surface or in-ground mounted to prevent moving or theft. The lid, liner, and mount are sold separately.
