

Rigid Plastic Liner for Trash Receptacles

MSRP \$83.20

SALE \$71.00

Highlights:

- Made from heavy-duty plastic material
- Keeps trash receptacle clean and sturdy
- Makes disposal of trash and cleaning up easier
- Adds to the appeal of your Webcoat trash receptacle

Complete your purchase of a stylish trash receptacle with the Rigid Plastic Liner for Trash Receptacles. The liner is inserted into a standard trash receptacle to catch the trash that will be put into the receptacle by visitors. This liner will hold the trash that is put in the receptacle, keeping the outer trash receptacle clean and intact. Make cleaning up easier by placing a trash bag in the liner. The sight and smell of trash can be distasteful to visitors and the liner limits its prevalence. Adding a liner will hide the unsightly trash, so, with trash receptacles that have gaps or holes, you will see the liner and not the trash, maintaining the look and appeal of the trash can. The liner is manufactured with heavy-duty plastic. The 32-gallon liner is available in black or gray while the 55-gallon liner comes in Gray only. This liner is available in two sizes allowing it to fit most Webcoat trash receptacles and their lids. Request a quote on a liner today.
