- Choose from any Webcoat textured polyethylene colors

This Flat Top for Trash Receptacles by Webcoat is a much-needed trash receptacle accessory to pair with your Webcoat trash can. This lid can fit all of Webcoat's trash cans so you can mix and match it with a variety of options. It is highly suggested that you consider a lid for your trash receptacles if it will be frequently used in large public areas. Not having a lid on trash receptacles in your area will lead to an overflow of trash outside of the can, onto the ground, and in surrounding areas. This is unsightly, unclean, and can be unpleasant for visitors. The Flat Top for Trash Receptacles features an 8-inch central hole for a stylish appearance but easy and functional design to any of Webcoat's receptacles. This receptacle is made of metal and can be customized in different textured polyethylene colors to match your trash receptacle.
