MSRP \$1,604.00

SALE \$1,364.00

Highlights:

- Rolled seat edges sit comfortably against legs
- Tough 1-5/8-inch all-weather metal framework
- Expanded metal surfaces permit helpful airflow
- Powder coat and textured polyethylene finishes in customizable colors

The Rolled Octagon Portable Table is a stable and dependable commercial-grade outdoor table by Webcoat. This all-weather furniture works great for any area that has many visitors coming to eat or mingle. Its handsome design and solid construction let it fit equally well in schools, parks, restaurants, or resort strips. The tabletop and seats are made with textured polyethylene coated, 3/4-inch #9 expanded metal. The polyethylene coating covers the metal in durable color finishing that has a long life that will resist fading. The frame is painted with a powder coat application equally capable of protecting your investment. Both coats come in a mix of colors that you can choose from to best match the unit to your site. The expanded metal of the seats and tabletop help those surfaces to remain cool on hot days and drain water during rainy days, making it adaptable for any weather or season. This design also keeps the table light enough to move wherever you would like. Pre-drilled holes in the frame also allow for surface mounting (surface mounting hardware not included). There is a standard sized umbrella port in the center of the tabletop should you wish to add a shade.
