ASTM F1487-17

CPSC PUB #325

Get your hard hats on, the Benny Bulldozer Fun Bounce is ready for action. Its intuitive design allow preschoolers to recognize its function and begin bouncing in seconds. The bulldozer theme imitates the real life machinery; allowing kids to live out their fantasy of operating one. They can pretend to clock-in, hop on and start their nine to five. This piece of equipment is small enough that finding an installation point could not be any easier. The Benny Bulldozer Fun Bounce is made of rotationally molded plastic that can withstand grueling daily shifts at the gravel pit. The base is made of durable steel that is sure to keep kids bouncing for a long time. The galvanized steel handle is used for children to grip on tightly, adjust their wait accordingly and propel themselves back and forth. Driving heavy duty equipment has never been this fun.
