Parents no longer have to cringe when their child wants to use a bike. The MyRider Balance Bike is designed specifically to promote balance and coordination. In fact, it does not have pedals or training wheels; it is built like a tricycle, only much more innovative. Kids love the bright yellow shade and you will appreciate that beneath that color is a powder-coated frame that resists scratches and rust. The welded steel frame is extremely durable with nylon bearings that are self-lubricating and long-lasting. The handlebars are comfortable to hold onto as they have been given heavy duty rubber handgrips and you do not have to worry about shoelaces or fingers getting stuck in the spokes of the wheels because there are none. The MyRider Balance Bike arrives fully assembled, with a 5-year warranty.
