Everything about this MyRider Tandem is inviting and fun for kids, yet safe and comfortable to offer peace-of-mind for parents. This is not a typical bicycle built-for-two; the person in the back gets to kick back and enjoy the scenery on a cozy seat with a nonslip footrest. The child in front will love the easy-to-grip, heavy duty rubber handles and angled foot pedals. There is even a trailer hitch in case they have a load to tow! There are no spokes to cause injury on these solid rubber wheels and it features self-lubricating and long-lasting nylon bearings. This is a product that will get passed down from one child to the next, or used for years on the playground because it is made with a durable welded steel frame that has been powder-coated to resist rust and scratches. It even features a 5-year warranty, and assembly is easy.
