One glance at the MyRider 3-Wheel Flying V Scooter and you just know it is going to provide hours of entertainment. Kids are happy that they are permitted to actually use a scooter and parents get peace-of-mind, thanks to the innovative safe design. The first thing you notice is the platform; it is nice and wide for those that have not developed their balancing skills yet. The footplate is V-shaped and boasts a nonslip surface. Also the placement of two tires in the front and one in the back helps with balance and steering as well. There is no pinch fork and the handgrips are made from heavy duty rubber. The steel frame is welded for durability and powder-coated to resist scratches and rust. Safety is also increased thanks to the spokeless rubber wheels and absence of protruding hardware. The MyRider 3-Wheel Flying V Scooter assembles with ease, and comes with a 5-year warranty.
