Age Group: 24 to 36 months

Unit Size: Seat 4" high, Handlebars 17-1/2" high

For those that prefer to sit a little lower to the ground so they can pedal hard and pick up speed, the ClassicRider 10-inch Pedal Pusher Toddler Trike is perfect! It is recommended for children 24 to 36 months old and sits only about 4 inches off the ground. Children comfortably sit in a nonslip seat with a high supportive back, and hold onto heavy duty rubber grips as they use pedals with non-exposed hardware to operate the trike. Unlike other trikes, there is no concern of shoestrings getting tangled in spokes as these rubber wheels have been made without them. The ClassicRider 10-inch Pedal Pusher Toddler Trike is sure to excite children as they speed around the playground with the wind whipping by. The welded and powder-coated frame and self-lubricating nylon bearings are all made to last and it even comes with a 5-year guarantee and lifetime support. This trike ships fully assembled.
