There is no reason why children should have to wait until they are coordinated or their legs are strong enough to pedal to go for a ride. The SilverRider 8-inch Pusher Toddler Trike looks just like the trike older kids are cruising around on only there are no pedals. Solid rubber tires, spokeless steel wheels, one-piece welded crank, and a frame-mounted seat offering back support are thoughtful safety features that this trike offers. Of course, you will appreciate that it is incredibly solid yet lightweight, so you do not have to exert all of your energy to push it. This stylish trike features durable chrome plating and a 5-year guarantee. It ships fully assembled so it is ready to use right out of the box.
