**Unit Size:** Seat 12-1/2" high, Handlebars 19-1/2" high

The SilverRider 8-inch Pedal Pusher Toddler Trike is perfect for little ones that are a bit too big to push, yet not strong or big enough for a larger model. This trike is super lightweight so it is easy for children to operate and since there is no hardware exposed on the pedals, it is safe for them to do so too. Adding to the safety features are rubber tires, spokeless wheels and a good amount of back support on the frame and mounted seat. This trike is crafted from a one-piece welded crank and features durable chrome plating. The finish is certainly one that will see a nice long life. It even has a five-year guarantee and Mr. Good Pedal lifetime service and replacement parts are available. With its modern styling of red and chrome, this is one kids will be drawn to for sure. The SilverRider 8-inch Pedal Pusher Toddler Trike comes fully assembled right out of the box.
