Unit Size: 66" long x 28" wide x 57" high

One has to wonder why it took so long for such a brilliant means of transportation to be created for children. Whether you have a zoo, park, an amusement park or anywhere else that kids love to visit, parents and guardians will certainly appreciate using the Runabout 6-Seat Stroller, rather than trying to keep everyone together in a group or listening to complaints of being tired. It features stadium seating for six with thoughtful headrests, polystyrene foam padding, and a five-point harness system. As large as it is, it is super easy to maneuver with a foot push bar, slow-down braking system and a commercial grade parking brake. The canopy shields children from harmful UV rays and the operator will appreciate the sizeable storage compartment. It fits through a standard doorway and comes with a three-year warranty.
