

Rhino Skin Playground Balls (set of 6)

MSRP \$55.00

SALE \$35.00

Rhino Skin Balls for Schools and Playgrounds

You will have a hard time finding a better ball to have in your activity center, day care, gym, or playground than Rhino balls. These Rhino Skin playground balls by Champion Sports are made to last, yet they are surprisingly soft. The six bright colors that they come in are easy to see on the field and easy to find in the tall grass when one gets kicked in the wrong direction, unlike some other playground balls. If you care about the planet, you will be thrilled to learn that Rhino balls are environmentally friendly, too! These Rhino Skin playground balls are high-quality, durable, and filled with foam, so they are appropriate for children of all ages to play with. And with a diameter of 8.5 inches, Rhino balls are practical to use for an array of activities.

Champion balls are perfect for playing dodgeball. They are durable enough to throw and soft enough to hit somebody without hurting them. Every playground should have a collection of Champion balls to help kids have fun while staying safe. Some schools have decided to ban some playground games and balls because they can cause injury, but why take the fun out of recess? Instead, use a softer alternative that won't hurt kids, like these Champion balls.

AAA State of Play makes it a top priority to provide excellent service to all of our customers, so if you're looking to buy Rhino Skin balls, you're in the right place. [\[Read More\]](#)
