- Available as in-ground or surface mount

Webcoat has designed this Picnic Table Arch Fabric Shade perfectly to provide a more pleasant experience to everyone sitting at the table. It is long enough to fit a table that is 6 feet long and installation is a breeze. In fact, you can choose from surface or in-ground mounts for your exact needs. The great thing about this shade is that it is made to protect against harmful UV rays and stand up against harsh environmental elements. Unlike a traditional table umbrella that is prone to tearing and fading, this shade is made from polyethylene fabric so it will not be destroyed by a few gusts of wind. The Picnic Table Arch Fabric Shade is available in a variety of colors in both the fabric of the shade and the powder-coated metal of the supports. Please speak with a AAA State of Play salesperson to discuss currently available color options and discuss scheduling.
