This 10 Gallon Green Galvanized Steel Waste Receptacle by DOGIPOT is the perfect way to ensure your parks, dog parks, trails, playgrounds, and public areas are clean and free of dog waste. This strong, sturdy bin is able to withstand the weather of every season and to keep the dog waste (and all attendant smells) firmly inside at all times. The galvanized steel makes it incredibly strong and durable, and thanks to the perforated design, the bin is really easy to be cleaned, too. The lid is very efficient at keeping the smell contained within the bag, too. By offering this bin, you are setting a good example and ensuring that everyone with a dog disposes of the waste correctly. Don't forget to offer a bin like this when you are offering free bags in a dispenser, since this waste receptacle helps keep dog waste separate from your other trash receptacles. For an even sturdier waste receptacle option, consider DOGIPOT's 10 Gallon Green Aluminum Waste Receptacle, or choose the more affordable 10 Gallon Green Polyethylene Waste Receptacle.
